Product Milestones & Roadmap

Find. Book. Flow.

Version 1.0 · July 2026

PLATFORM	STACK	LAUNCH TARGET
Native iOS (iPhone)	SwiftUI · SwiftData · CloudKit	Q2 2027 · App Store
TOTAL MILESTONES	PROGRESS	DOCUMENT
7 Phases	1 Complete · 3 Active · 3 Planned	Confidential

This document outlines PilaPro's product milestones from initial build through App Store launch. Each phase details deliverables, ownership, timeline, and KPIs.

01

Foundation & Brand Identity

Q3 2026 · Engineering & Design

COMPLETED

Establish the full technical foundation and visual identity of PilaPro. This milestone covers the core iOS architecture, authentication, onboarding, and the complete brand design system.

DELIVERABLES

- Native iOS app (SwiftUI + SwiftData + CloudKit)
- Sign in with Apple authentication
- Role-based onboarding — Instructor and Trainee flows
- Full brand color palette: violet, terracotta, sage, cream
- Gradient UI system, typography scale, component library
- Splash screen, animated logo, brand tagline
- Xcode project setup with CI build pipeline

SUCCESS METRICS

- Build compiles without errors ✓
- All brand colors render correctly in light & dark mode ✓
- Onboarding completion rate target: > 80 %

02

Instructor Platform

Q3 2026 · Engineering

IN PROGRESS

Enable every Pilates instructor to build a rich, discoverable profile. Instructors configure their public page, specialties, session types, and weekly availability so trainees can find exactly the right fit.

DELIVERABLES

- Instructor profile creation & editing (name, bio, city, photos)
- Specialty multi-select: Mat, Reformer, Prenatal, Rehabilitation, etc.
- Session type selection: Private, Duet, Group, Online/Virtual
- Weekly availability calendar — set recurring open time slots
- Public profile preview — see the page as a trainee sees it
- Instructor Dashboard with upcoming sessions & stats cards
- CloudKit public database record sync for profiles & availability

SUCCESS METRICS

- Profile creation < 3 minutes end-to-end
- Availability slots visible on public profile within 5 seconds
- Target: 50 instructor profiles at launch

03

Trainee Discovery & Search

Q4 2026 · Engineering & Product

IN PROGRESS

Give trainees powerful, intuitive tools to find the instructor who is right for them — whether they search by city, speciality, availability, or simply browse instructors near them on a map.

DELIVERABLES

- Full-text search by city and instructor name
- Specialty filter sheet (single or multi-select)
- List view with branded Instructor Cards (gradient avatar, sage tags)
- Map view with custom pin annotations (violet→terracotta gradient)
- "Near Me" — CoreLocation + radius-based CloudKit query
- Instructor detail page: hero gradient header, bio, tags, reviews
- Smooth navigation & scroll performance on all iPhone sizes

SUCCESS METRICS

- Search results load < 2 seconds on LTE
- Map renders up to 100 pins without frame drops
- Target: > 70 % of trainees reach an instructor detail page per session

04

Booking & Session Management

Q4 2026 · Engineering

IN PROGRESS

The core marketplace transaction — trainees request sessions, instructors confirm or decline, and both parties manage their schedules in one place. Push notifications keep everyone in sync in real time.

DELIVERABLES

- 3-step booking flow: Date → Time Slot → Confirm
- Available slot fetch from instructor's CloudKit availability records
- Booking status lifecycle: Pending → Confirmed → Completed / Cancelled
- Trainee booking history (upcoming & past) with status badges
- Instructor swipe actions: Confirm, Decline, Mark Complete
- Cancellation flow with optional reason field
- CloudKit push notifications (CKSubscription) for both roles
- APNs remote-notification background mode configured

SUCCESS METRICS

- Booking request delivered to instructor < 10 seconds via push
- Booking confirmation rate target: > 65 %
- Zero double-bookings (slot atomically marked as taken on confirm)

05

Reviews & Reputation System

Q1 2027 · Engineering & Product

PLANNED

Trust is the foundation of a marketplace. This milestone introduces verified post-session reviews, star ratings, and dynamic instructor reputation scores — so trainees can book with confidence.

DELIVERABLES

- Star rating picker (1–5) + text review after each completed session
- Reviews stored in CloudKit public database (visible to all trainees)
- Instructor average rating auto-computed after each new review
- Reviews list on instructor profile page (newest first)
- Review gating — only trainees with a completed booking can review
- Instructor response to reviews (Phase 5b)
- Spam / inappropriate content reporting flow

SUCCESS METRICS

- Post-session review submission rate target: > 40 %
- Average rating accuracy within 0.1 stars of true mean
- Target: > 5 reviews per instructor within 60 days of launch

06

Payments & Instructor Payouts

Q1 2027 · Engineering & Finance

PLANNED

Monetise the platform by integrating secure in-app payments at the point of booking. Instructors receive automatic payouts after each completed session, and the platform retains a transparent service fee.

DELIVERABLES

- Stripe Connect integration for instructor onboarding & payouts
- Credit / debit card payment at booking confirmation
- Apple Pay support
- Platform service fee configuration (suggested: 10–15 %)
- Instructor payout dashboard — earnings summary, payout history
- Refund flow for cancellations within policy window
- Receipt emails via Stripe / SendGrid
- PCI-DSS compliance — no card data stored on device or CloudKit

SUCCESS METRICS

- Payment authorisation < 3 seconds
- Payout to instructor within 2 business days of session completion
- Stripe fraud rate target: < 0.1 %
- GMV target Month 1 post-launch: \$10,000

07

Beta, Launch & Growth

Q2 2027 · Product, Marketing & Engineering

PLANNED

Close-beta with real instructors and trainees, iterate on feedback, then submit to the App Store and execute the go-to-market launch. This milestone also establishes the growth and analytics foundation.

DELIVERABLES

- TestFlight closed beta — 20 instructors, 50 trainees
- Crash reporting integration (Sentry / Firebase Crashlytics)
- Analytics events: sign-up, search, booking, payment, review
- App Store assets: icon, screenshots (6.7", 5.5"), App Preview video
- App Store Connect submission & review
- Landing page / marketing site (pilapro.app)
- Instructor acquisition campaign — Pilates studios in target city
- Launch press kit & social media assets

SUCCESS METRICS

- Beta crash-free session rate: > 99 %
- App Store rating at launch: ≥ 4.5 stars
- Month 1 targets: 100 instructors, 500 trainees, 200 bookings
- Day-30 trainee retention: > 25 %

Timeline Overview
